

Monitoring & Alerting Checklist

SRE Daily Health Checklist

A checklist for SREs to verify infrastructure reliability, deployment health, and system alerts before or during morning shift.

1. Monitoring & Alerts

- ☐ Review alert dashboards (CloudWatch, Grafana)
- ☐ Investigate PagerDuty/Opsgenie incidents
- ☐ Confirm resolution of past alerts

2. Infrastructure Health

- ☐ EC2 status checks
- ☐ Disk usage below threshold
- ☐ Load balancers routing properly
- ☐ RDS replicas healthy
- ☐ Kubernetes nodes ready

3. Security & Access

- ☐ Review IAM & MFA logs (CloudTrail)
- ☐ No login anomalies
- ☐ Check security group changes

4. CI/CD & Deployments

- ☐ Verify pipeline status (GitHub Actions, Jenkins)
- ☐ Failed builds resolved
- ☐ No blocked rollouts

5. Cost & Resource Usage

- ☐ AWS billing reviewed
- ☐ Flag oversized EC2/EBS

Monitoring & Alerting Checklist

- [] Clean up unused volumes/IPs

6. Standup Prep

- [] Note updates/issues for team
- [] Add plans to team dashboard
- [] Communicate blockers
